Professional Summary

MCA student graduating in 2026, skilled in Java, Spring Boot, REST APIs, SQL, and MERN stack development. Experienced in building backend services, full-stack applications, and real-time platforms. Strong foundation in OOP, DSA, DBMS, and SDLC, seeking an entry-level Software Engineer / Java Developer role.

Education

Master of Computer Application (MCA)	2024 – 2026
<i>JSS Academy of Technical Education, Noida AKTU CGPA: 8.27</i>	
Bachelor of Computer Application (BCA)	2021 – 2024
<i>Marwar Business School, Gorakhpur DDUGU 75.63%</i>	

Technical Skills

Languages	Java, JavaScript, C++
Frontend	React.js, HTML5, CSS3, Bootstrap
Backend & Frameworks	Node.js, Express.js, Spring Boot, Spring MVC, REST APIs, Microservices, Hibernate
Databases	MySQL, SQL Queries, JDBC, MongoDB, Mongoose
DevOps & Tools	Docker, Git, GitHub, Maven, Postman, VS Code, JUnit Basics
Core CS	DSA, OOP, DBMS, OS, Computer Networks, SDLC, Cloud Computing

Projects

Coderome — Real-time Coding Collaboration Platform | [GitHub](#)

- Built a real-time coding platform where users can write, run, and collaborate on code in shared rooms
- Implemented JWT authentication for secure login, protected routes, and user session management.
- Developed REST APIs for user management, room creation, and coding session data.
- Integrated real-time communication using Socket.IO for live code updates between users.
- *Tech: React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO, REST APIs*

Car Rental System — Java OOP Project | [GitHub](#)

- Developed a menu-driven car rental application using Java and Object-Oriented Programming principles.
- Implemented features for car availability, customer details, rent calculation, car booking, and return management.
- Applied encapsulation, inheritance, abstraction, and polymorphism to design clean and reusable classes.
- Used Java Collections and exception handling to manage rental records and improve program reliability.
- *Tech: Java, OOP, Collections Framework, Exception Handling*

Wanderlust — Full Stack Travel & Property Listing Platform | [GitHub](#)

- Built an Airbnb-style platform connecting travelers and hosts with end-to-end booking, authentication, and secure payment processing.
- Implemented **JWT-based authentication** and **Stripe payment gateway** for secure transactions with real-time booking confirmations.
- Developed real-time guest-host messaging using **Socket.IO**; hosts manage listings with photos, amenities, pricing, and availability calendars.
- Architected full **RESTful backend** with MongoDB/Mongoose; built search, filter, and review systems for a complete user experience.
- *Tech: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Stripe, Socket.IO*

Achievements & Interests

- Solved **problems** on [LeetCode](#) covering arrays, trees, graphs, and dynamic programming — consistent daily practice for placement preparation.
- Successfully completed Data Structures and Algorithms using Java — Apna College.
